

# Botanical PAPERWORKS

## What Is Seed Paper?

Seed paper is a special eco paper made from post-consumer waste. When you plant the paper in soil, the seeds in the paper germinate and grow into plants. The paper itself will biodegrade and no waste will be left behind.

## What Does It Grow?

Most Botanical PaperWorks products grow wildflowers, but herb and veggie options are available. In addition, you can select **native seed type options** for 11 different North American regions!

The classic wildflower blend includes Bird's Eye, Clarkia, Black-Eyed Susan, Sweet Alyssum, Catchfly and Snapdragon.

# Botanical PAPERWORKS

## Botanical PaperWorks Seed Paper Is...
